Next-Level  
**Locking Solutions**

Unbeatable Together

# Durable DIRAK Design Meets Smart iLOQ Technology

Electrical power, telecommunications, traffic control and many other industries require reliable latching solutions for equipment enclosures. As the leader in industrial enclosure latching, we are now taking our latches to the next level:

Our latest line of products combines maximum security and flexibility to create an ideal solution. These DIRAK-exclusive handles are tailor-made to work with the iLOQ line of electronic access control lock cores. Many latches feature IP65-level environmental protection and RC2-class vandalism protection.

**Protection against vandalism** thanks to sturdy design

**Weather-resistant** and durable

**Access management** with NFC technology

Many options to **fit a variety of applications.**

Product Line for iLOQ

D50S Half Cylinder

- ✓ Durably designed, many with **IP65 and RC2 ratings.**
- ✓ **Numerous variants** for a wide range of applications
- ✓ **Drop-in replacement** for easy retrofitting into existing cabinets.

- ✓ **NFC technology:** Wireless access powered by your smartphone
- ✓ **Failsafe:** No auxiliary power source is needed
- ✓ **Flexible:** Manage user access through the app

**DIRAK**

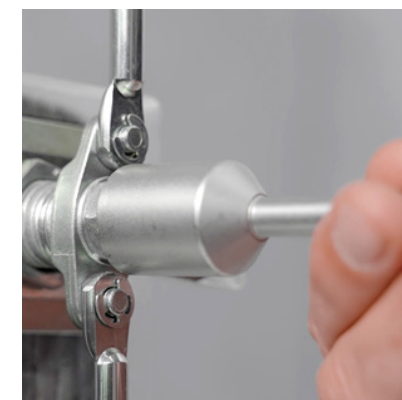

**Simple. Flexible.**  
Smart Access Control

Keys can be lost or end up in the wrong hands. Digital access permission by app is flexible, secure and can be granted or withdrawn at any time.

**Simple. Protected.**  
Security for Critical Infrastructure

Our new solutions for iLOQ withstand challenges ranging from weather conditions to opportunistic vandalism, as demonstrated by our study at Glasfaser Nordwest.

**Simple. Assembled.**  
Upgrade Existing Cabinets

Our solutions are not only suitable for original equipment, but they are also easily retro-fittable into many existing cabinets.

For demanding applications

# Custom-made solution portfolio

Electrical power, telecommunications, traffic and many other sectors require reliable latching solutions for industrial enclosures. As the specialists for latching systems, we are now going one step further:

EV Infrastructure

Automation Equipment

Transportation

Telecommunications

Electrical Infrastructure

IT and Data Centers

Traffic Engineering

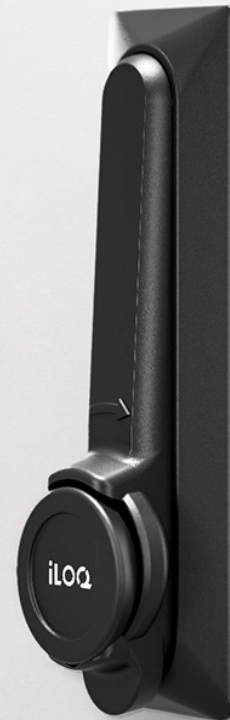

Energy and Energy Storage

## Swinghandle RS 130 for Rod Latch

Would you like maximum security for your rod-latch equipped enclosure? Our swinghandle RS 130 is the ideal choice. Protected to IP65, it is available in many different versions.

|                              |                               |
|------------------------------|-------------------------------|
| <b>Product system number</b> | <b>2-110.01</b>               |
| Protection class             | IP65                          |
| Field of application         | Indoor and outdoor            |
| Closing rotation             | 135°                          |
| Cutout                       | Ø 46 or 46                    |
| Assembly                     | Left or right                 |
| Material                     | Swinghandle zinc die, Dish PA |
| Color                        | Black                         |

### Escutcheons

To provide added protection for iLOQ profile cylinders, we have developed a line of escutcheons that can be used in conjunction with the iLOQ profile cylinders.

These escutcheons provide a durable and protective surround that helps protect the iLOQ from intentional or accidental damage.

They can be secured from the front or rear and can be purchased with installation templates for simplified installations and retrofits.
